

**B-173 3-AMINO-9-ETHYLCARBAZOLE METHOD FOR
LEUKOCYTE PEROXIDASE**

Fixation: **FORMALIN-ACETONE FIXATIVE**, (B-173-1)

PROCEDURE:

1. Fix thin blood films in **Formalin Acetone Fixative**, (B-173-1) for 15 seconds.
2. Rinse gently in distilled water.
3. Stain in **3-Amino-9-Ethylcarbazole** (B-173-2) staining solution for 2 ½ minutes.
4. Wash in running tap water.
5. Stain in **Mayer's Hematoxylin** (B-173-3) for 8 minutes.
6. Wash in tap water, air dry, and mount in **Glycerin Jelly** (M-12).

Stain Results:

Sites of peroxidase activity	Red-Brown granules
Nuclei	Blue
