

Beta-Catenin

USA IV D

Nuclear accumulation of this protein has been demonstrated in fibromatosis lesions of the breast and abdomen so it is useful in differentiating this lesion from others.

Mouse Monoclonal, Clone: 14

Control: Fibromatosis of Breast. **Embedded:** Paraffin and frozen tissue. **Storage:** 2-8°C.
Shelf life: Up to 36 months. **Isotype:** IgG₁ **Cellular localization:** Nuclear

Fibromatosis of Breast

Catalog no.	Volume
BC-210-1	0.1 ml concentrated
BC-2010-2	0.5 ml concentrated
BC-2010-3	1 ml concentrated
BC-2010-4	1 ml Prediluted
BC-2010-5	7 ml Prediluted
BC-2010	5 Positive control slides
