

L-752, DELAFIELD'S HEMATOXYLIN

Fixation: Zenker, Bouin or Formalin 10%

Sections: Paraffin

Staining:

1. Deparaffinize and hydrate to distilled water.
2. Stain for 15 minutes in a solution containing equal volumes of **Delafield's Hematoxylin** (L-752-1) and distilled water. Wash in water.
3. Differentiate in **Acid Alcohol** (L-752-2) until the sections turn red.
4. Blue sections in **Sodium Acetate, 1%** (L-752-3) or **Ammonia Water** (L-752-3A) or **Lithium Carbonate Solution** (L-752-3B).
5. Wash thoroughly and counterstain.
