

L-757, WEIGERT'S IRON HEMATOXYLIN

Fixation: Any general Fixative

Sections: Paraffin

Staining:

1. Deparaffinize and hydrate to distilled water.
2. Stain in working **Weigert's Hematoxylin** [equal volumes of **Part A** (L757-1) and **Part B** (L-757-2) for 5-6 minutes]
3. Counterstain as desired. **Van Gieson's** (F-757-3) for 3-5 minutes is recommended. Rinse in distilled water.
4. Differentiate in 95% alcohol. Dehydrate, clear and mount.

Staining Results:

Nuclei	Deep blue to black
--------	--------------------
